

Sync Recovery Code

The Recovery Code allows you to sync your bookmarks across multiple devices and recover your synced data if you lose access to a device.

Keep this information safe and secure.

Anyone with access to this code can access your synced data.

How does this code work?

1

Open DuckDuckGo on another device and go to Sync in Settings.

2

Go to Scan QR Code and scan the QR code or copy and paste the text code.

3

Sync will be activated and you'll once again have access to all of your data.

DuckDuckGo
